Profile Summary

B.Tech AI & Data Science student who builds real, working systems — not just tutorials. Shipped projects span a zero-trust behavioral biometrics platform (React, TypeScript, Supabase, ML-based anomaly detection with explainable AI) and multi-tenant SaaS platforms with role-based access and real-time features. Strong in React, TypeScript, Python, SQL, and cloud-backed architectures, backed by solid DSA fundamentals — looking to bring this blend of AI, security, and full-stack thinking to a product team

Education

Bachelor of Science in Computer Science CGC UNIVERSITY MOHALI GPA: 8.03/10	2024-2028
High School Diploma Minerva Public School Ghumarwin Percentage: 80%	2024
Matrix Diploma Minerva Public School Ghumarwin Percentage:90%	2022

Experience

Full Stack Development Intern at Readynest Corp. - Developed and enhanced responsive web applications using modern full-stack technologies. - Worked on frontend UI development, improving usability, responsiveness, and overall user experience. - Integrated and managed backend functionality and APIs for application features - Collaborated on real-world development tasks and received a Letter of Recommendation (LOR) for performance and contribution.	Jun 2026 - July 2026
GDG Social Media Team at Google Developer Groups (GDG) Contributed to the Social Media Team by creating and managing engaging content, supporting event promotions, and helping improve the community's online presence.	Jan 2026 – Present

Projects

Aegis-AI-Autonomous Zero-Trust Behavioral Security & Continuous Biometrics Intelligence Platform 🔗 - Developed an AI-powered continuous authentication concept for detecting suspicious user behavior. - Designed website/link safety analysis to identify potentially malicious URLs. - Implemented risk scoring based on behavioral and contextual signals. - Planned OTP-based verification as an additional security layer. - Tech: Next.js, React, TypeScript, NestJS, Socket.io, PostgreSQL, Prisma, Redis, Docker, ML

Fluxora — Team Collaboration & Project Management Platform [🔗](#)

- Built a full-stack collaboration platform for managing teams, projects, and tasks.
- Built a full-stack collaboration platform for managing teams, projects, and tasks.
- Developed dashboards for project analytics, task tracking, and activity monitoring.
- Integrated real-time communication and collaborative workflows for teams.
- Tech: React, TypeScript, Vite, Tailwind CSS, Supabase, PostgreSQL

DeployFlow — VS Code Cloud Deployment Extension [🔗](#)

- Developed a VS Code extension concept for simplifying application deployment.

- Designed workflows to deploy projects directly from the developer environment.
- Added configuration-based deployment support for different project environments.
- Focused on reducing repetitive deployment steps and improving developer productivity
- Tech Stack: TypeScript, VS Code Extension API, Node.js, Netlify API, SHA-1, SecretStorage

Dynamic Form Builder — ReadyNest Internship [🔗](#)

- Built a full-stack dynamic form builder with authentication, multiple field types, form publishing, public sharing, response collection, and dashboard management
- Implemented CRUD operations, responsive UI, and persistent response storage using Supabase/PostgreSQL with secure user authentication.
- Tech Stack: Next.js, TypeScript, Tailwind CSS, shadcn/ui, Supabase, PostgreSQL

Skills

- **Languages:** JavaScript, TypeScript, Python, Java, C++, SQL
- **Frontend:** HTML, CSS, React.js, Next.js, Tailwind CSS, Vite, Framer Motion
- **Backend:** Node.js, Express.js, FastAPI, REST APIs, JWT Authentication
- **Databases:** PostgreSQL, MongoDB, Redis, MySQL, Supabase
- **DevOps & Cloud:** Docker, Git, GitHub, Vercel, Render, REST APIs
- **Tools:** VS Code, Postman, Git, GitHub, npm, Git Bash, Chrome DevTools

Achievements & Leadership

- ReadyNest Full-Stack Internship — Successfully completed a real-world development internship and received a Letter of Recommendation.
- LeetCode DSA Practice — Maintaining consistent problem-solving practice focused on C++ and Data Structures & Algorithms.
- Multiple Full-Stack Projects — Built projects including Fluxora, JudgeNest, Smart Campus Utility, and DeployFlow.
- Team Collaboration — Coordinating with team members to manage tasks, ideas, and project execution.
- Technical Project Leadership — Taking ownership of designing and developing full-stack and AI-focused projects.
- GDG Social Media Team — Leading social media planning, content coordination, and team activities.

Certifications

- **AWS Cloud Practitioner Essentials** — Amazon Web Services
- **Introduction to Generative AI Studio** — Google Cloud
- **Software Engineering Job Simulation** — JPMorgan Chase & Co. (Forage)
- **Introduction to Modern AI** — Cisco Networking Academy
- **Adobe Hackathon Certificate** — Unstop
- **Data Analytics Job Simulation** — Deloitte
